**THE General Service Packing For...**

**PUMPS**  
**AGITATORS**  
**MIXERS**

**Thermally Conductive**  
**Good Chemical Resistance**  
**High Temperature**

ML 3600 is an excellent general service packing exhibiting good thermal conductivity characteristics resulting in higher shaft speed FPM ratings than its competitive counterparts. SEPCO Style ML3600 is designed for all applications involving shaft speed up to 3600 FPM, temperatures to 550 degrees F, and will withstand pH values between 0-14. Available in sizes ranging from 3/16"-1 1/2" on 1, 2, 3, 10, and 25 pound bulk spools, pre-cut rings, die-formed rings, and spiral pack.
