

# SEPCO Style ML8002

## High Speed Packing

<b>Construction:</b>	Multi-Lok Braid
<b>Features:</b>	PTFE fibers specially treated with finely ground particles of graphite to increase thermal conductivity and reduce thermal expansion resulting in higher shaft speeds.
<b>Treatment:</b>	Lubricated with a proprietary high speed lubricant.
<b>Equipment:</b>	All reciprocating and rotating shafts.
<b>Recommended For:</b>	All reciprocating and rotating shafts.
<b>Limitations:</b>	Shaft speeds to 4900 FPM; temperatures to 550°F / 287°C pH range 0 - 14.

**Certified to ISO 9001: 2000 Standards.**
